

EPR Ely Limited

Client Brief

To carry out a visual inspections of the all the ladders and platforms at Ely power Station.

The equipment falls under the Provision and Use of Work Equipment Regulations (PUWER) 1998 and as such requires a regular testing and inspection regime.

Our Solution

Arco Professional Safety Services Ltd supplied a qualified inspection team, to carry out a detailed visual examination within touching distance of the access platforms and ladders at Ely Power Station.

A full report was produced showing our findings and recommendations.

Benefit of our Solution

Our inspection team could inspect the ladders and platforms whilst normal operations continued on site allowing for minimum disruption to the client's operations and ensuring the project was delivered on time and to budget.
